

22nd June 2018

XTERCONNECT & GENIATECH Partner with CORTUS to enable Secure IoT Solutions based on Dash7 Technology

XTERCONNECT and **GENIATECH** having already developed a range of professional industrial IoT solutions using LoRa technology have entered into a Strategic and Industrial Partnership with **CORTUS** to develop and deliver a range of secure products and solutions for IoT using its CloT25Low Power Internet of Things Platform based on Dash7 technology.

XTERCONNECT, is an IoT innovation and solutions company based in southern France, committed to developing secure IoT solutions, easy to integrate with partner legacy or new sensors and devices, as well as having its own range of IoT gateways and sensors allowing them all to seamlessly connect to any IoT network and cloud platform. **XTERCONNECT** innovate and develop IoT solutions primarily for industrial IoT customers in partnership with **GENIATECH**, its strategic partner and investor.

GENIATECH is a Shenzhen based company and global ODM / OEM manufacturer for technology, focusing on IoT and Media and supplying innovative solutions for hardware and software designs based on all operating systems.

CORTUS is a leading semiconductor and embedded systems solutions company providing a large range of embedded systems solutions including HW, SW, processors (including RISC-V ISA processors), digital, analog and RF IP, prototyping and verification solutions across different market segments. In 2018 Cortus has successfully completed its new CloT25Low Power Internet of Things Platform based on Dash7 Alliance technology and remain key driver and promoter of Dash7A technology.

The strategic partnership will focus on truly addressing each segment of the entire IoT value chain from Dash7A and security at semiconductor level through products and solutions based on it, to global distribution through strategic partnerships, ensuring that IoT customers worldwide benefit from delivery of what we define as SSASS (Secure, Seamless, Affordable & Scalable Solutions).

The management of **XTERCONNECT** said: "We are very pleased by what the Cortus platform based on Dash7 technology will offer, not only addressing customer needs but focusing on making a more secure IoT for industrial and residential markets, and we are excited to enter into this strategic long term partnership.

GENIATECH President Mr Fang said: "Based on our joint skillset, experience and approach to the market, together with the ability to enable value across the entire IoT chain, we believe we can propose the right solutions for our customers.

Michael Chapman, President of **CORTUS** said: We welcome both Geniatech and Xterconnect as strategic industrial partners and are pleased to enable development of new products & solutions to scale our platform and Dash7 technology to an industrial level.
